

DAILY EXPENSE CRUD MANAGER

PROJECT BY SHRIYA MISTRY

INTRODUCTION

The Daily Expense CRUD Manager is a Python-based application designed to help users track and manage their daily expenses efficiently. This system addresses the growing need for personal financial management tools that are simple, accessible, and effective.

The application implements core CRUD (Create, Read, Update, Delete) operations while incorporating advanced features like multi-level categorization, budget analysis, and spending insights. Built entirely in Prolog, it demonstrates practical application of programming fundamentals in solving real-world problems.

Exploring creativity

PROBLEM STATEMENT

Individuals and households struggle with effective daily expense tracking and financial management. The existing manual methods of recording expenses in notebooks or scattered digital notes lead to poor financial visibility, inefficient categorization, lack of budgeting and no historical analysis. My project builds a basic expense tracking system, through which user can categorize there expenses.

Exploring creativity

FUNCTIONAL REQUIREMENTS

- Expense Management
- Categorization System
- Budget Management
- Reporting and Analytics

Exploring creativity

EXPENSE MANAGEMENT

- **Create:** Add new expense entries with detailed categorization
- **Read:** View all expenses with filtering and search capabilities
- **Update:** Modify existing expense records
- **Delete:** Remove incorrect or duplicate entries

CATEGORIZATION SYSTEM

- **Two-level categorization** : Primary (Needs/Wants) and Secondary (Food, Entertainment, etc.)
- **Flexible category management** : Ability to add/modify categories
- **Automatic categorization** : Smart suggestions based on expense patterns

BUDGET MANAGEMENT

- **Monthly budget setting** : Define overall spending limits
- **Real-time tracking** : Monitor budget utilization
- **Daily budget calculation** : Automatic computation of daily spending limits
- **Overspending alerts** : Notifications when approaching budget limits

REPORTING AND ANALYTICS

- **Category-wise spending analysis:** Breakdown of expenses by categories
- **Monthly summaries:** Comprehensive spending overview
- **Trend analysis:** Comparison with previous months
- **Remaining days calculation:** Projected spending capacity

Non-Functional Requirement

01

Performance

All operations gets complete within 2 seconds and it can handle upto 10,000 records efficiently

03

Reliability

Application is available for record 24/7. It has 99.9% accuracy in data storage and retrieval.

02

Usability

New Users can become proficient within 15 minutes. It has single line interface with clear menus.

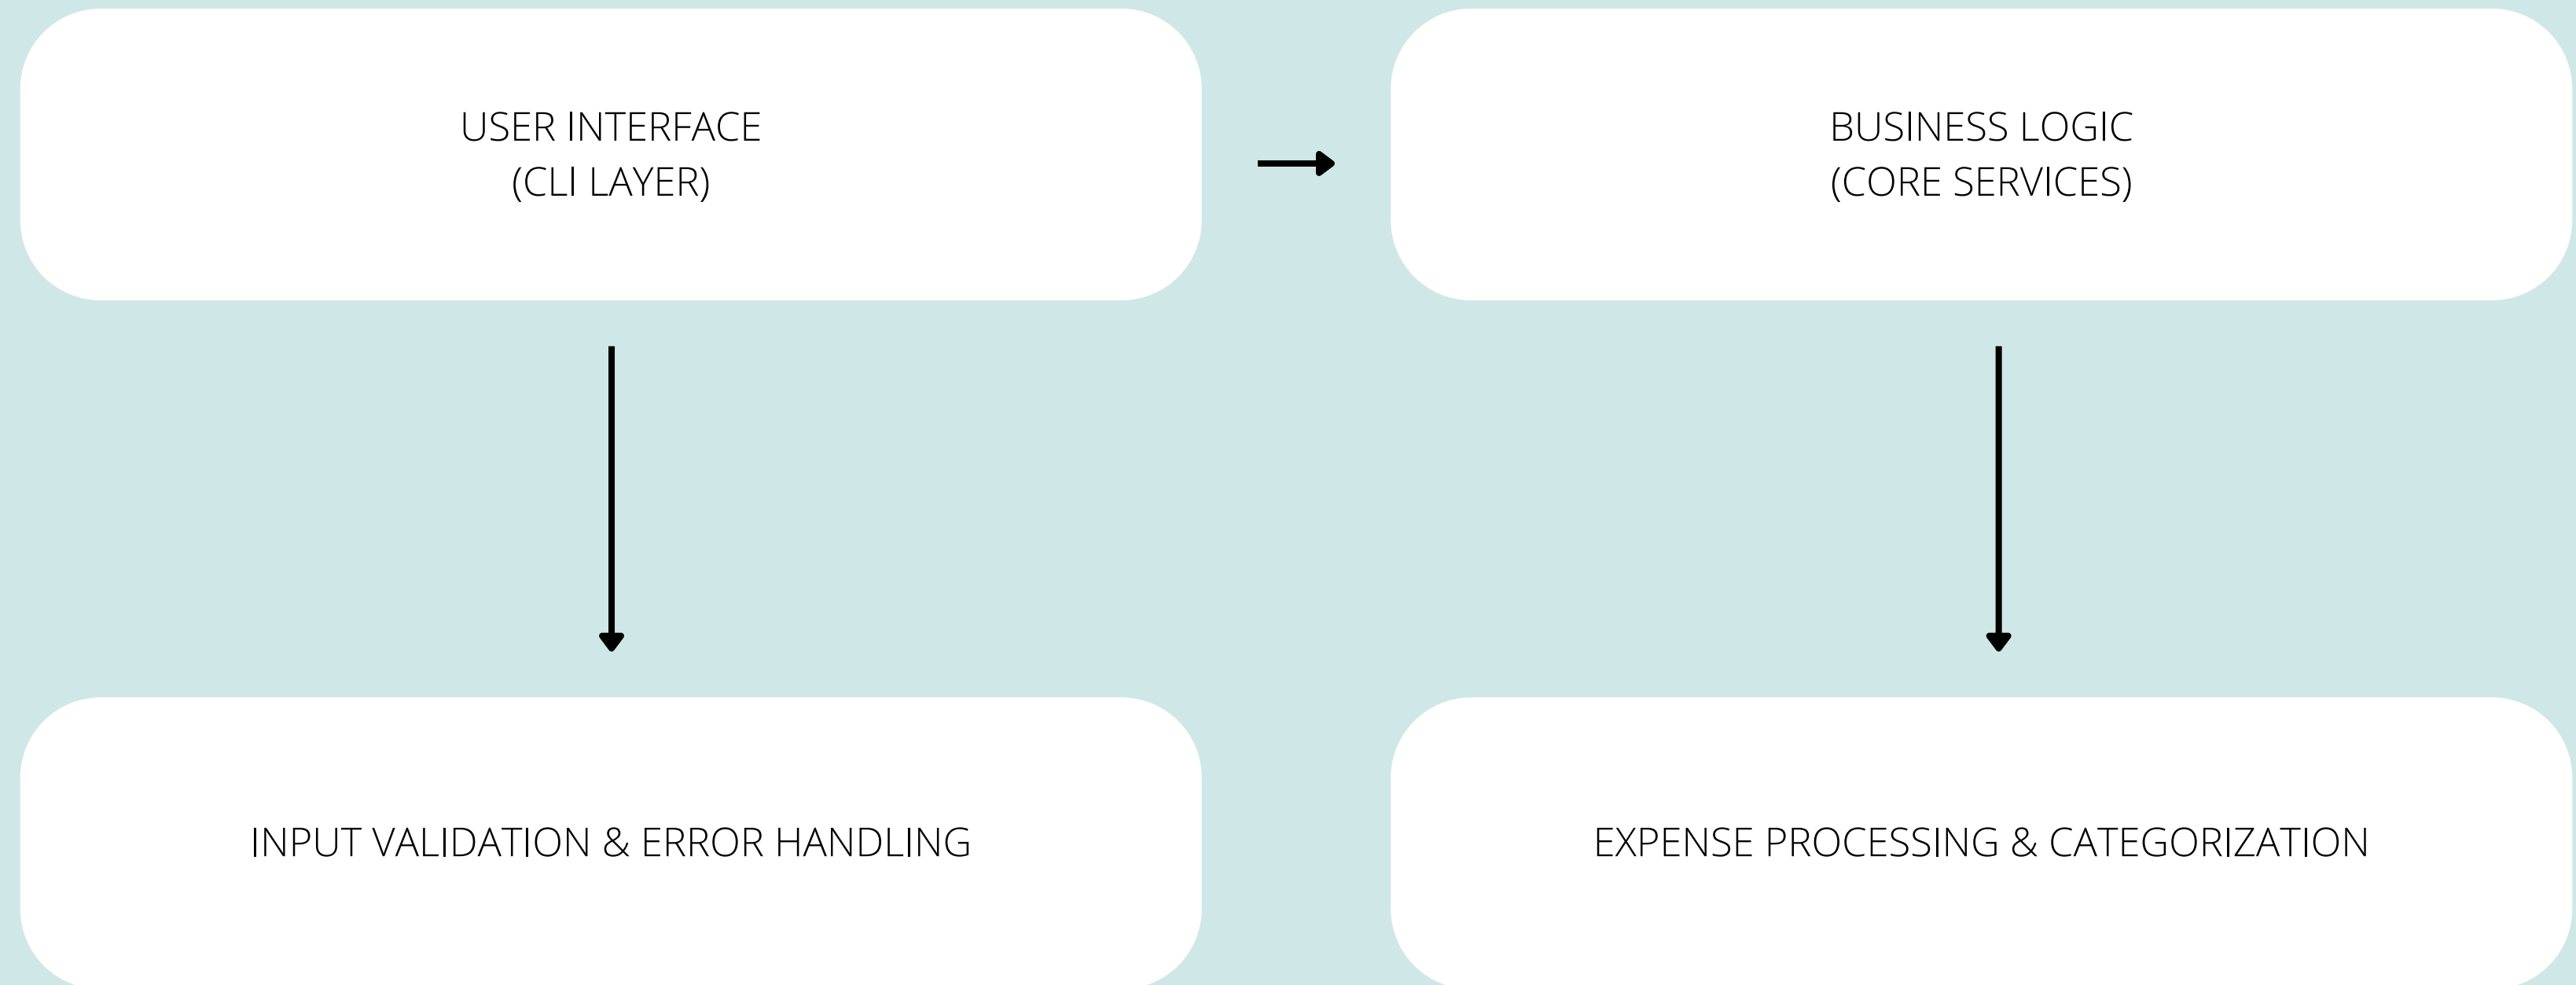

04

Maintainability

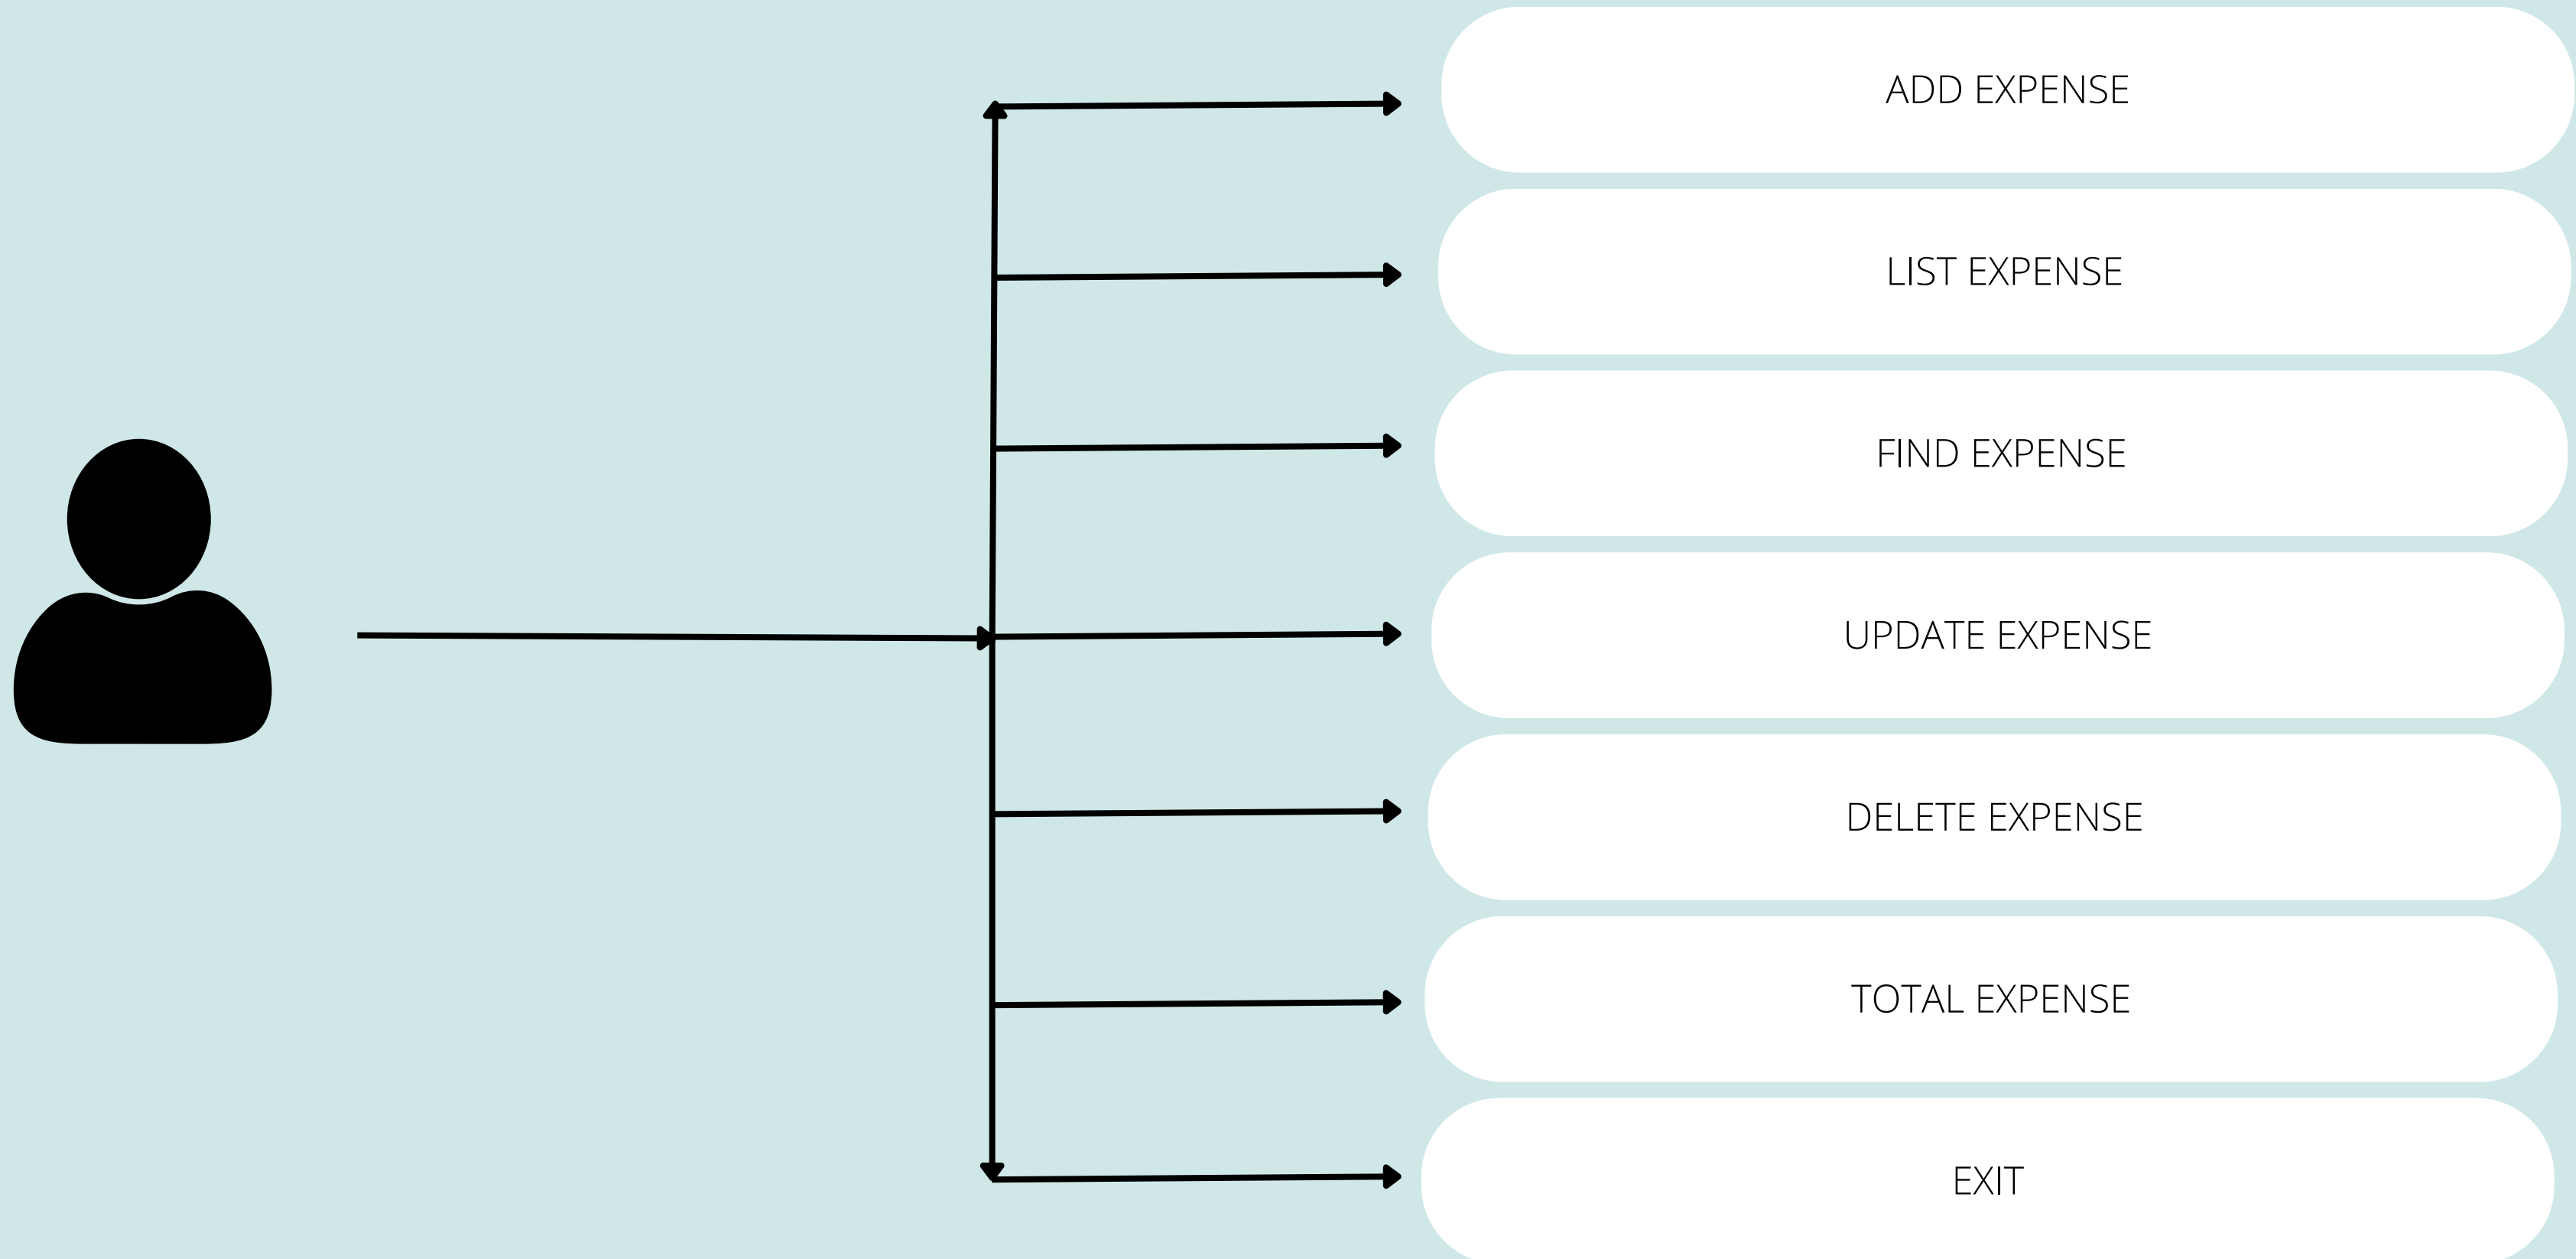

It has well-structured and documented codebase. New Features and categories can be easily added.

SAMPLE OF OUTPUT

```
?- start.  
Expense database initialized with sample data.  
  
=== DAILY EXPENSE CRUD MANAGER ===  
1. Add New Expense  
2. List All Expenses  
3. Find Expense by ID  
4. Update Expense  
5. Delete Expense  
6. View Statistics  
7. Search Expenses  
8. Exit  
Choose an option (1-8): 2  
  
=== ALL EXPENSES ===  
ID: 1 | Date: date(2024,1,15) | Category: Food | Amount: $25.50 | Description: Lunch at restaurant  
ID: 2 | Date: date(2024,1,15) | Category: Transport | Amount: $12.00 | Description: Bus fare  
ID: 3 | Date: date(2024,1,16) | Category: Entertainment | Amount: $45.00 | Description: Movie tickets  
ID: 4 | Date: date(2024,1,16) | Category: Food | Amount: $15.75 | Description: Groceries  
ID: 5 | Date: date(2024,1,17) | Category: Utilities | Amount: $120.00 | Description: Electricity bill  
ID: 6 | Date: date(2024,1,17) | Category: Food | Amount: $8.50 | Description: Coffee
```

SAMPLE OF OUTPUT

```
Choose an option (1-8): 6
```

```
=== STATISTICS ===
```

```
Total Expenses: $226.75
```

```
Category Breakdown:
```

```
=====
```

```
Food: $49.75
```

```
Transport: $12.00
```

```
Entertainment: $45.00
```

```
Utilities: $120.00
```

```
Choose an option (1-8): 1
```

```
=== ADD NEW EXPENSE ===
```

```
Enter date (format: date(Year,Month,Day)): date(2024,1,18).
```

```
Enter category: 'Shopping'.
```

```
Enter amount: 75.50.
```

```
Enter description: 'New clothes'.
```

```
Expense added successfully! ID: 7
```

CHALLENGES FACED

- Technical Challenges
- Design Challenges

Exploring creativity

TECHNICAL CHALLENGES

- **Data Validation** : Ensuring robust input validation for various edge cases
- **File Handling** : Managing CSV file corruption and recovery
- **Error Recovery** : Implementing graceful error handling without crashing
- **User Experience** : Creating intuitive CLI interface for non-technical users

DESIGN CHALLENGES

- **Categorization Logic** : Designing meaningful expense categories
- **Budget Algorithm** : Creating realistic daily budget calculations
- **Data Structure** : Choosing between lists, dictionaries, and classes
- **Modularity** : Balancing simplicity with proper separation of concerns

SOLUTION

- **Comprehensive Validation** : Multi-layer input validation
- **Defensive Programming** : Try-catch blocks and error logging
- **User Feedback** : Clear messages and recovery instructions
- **Incremental Development** : Step-by-step feature implementation

LEARNING & KEY TAKEAWAYS

TECHNICAL LEARNING

I mastered CSV operations and file I/O best practices. I learned to create reusable, maintainable code modules. In addition to that, practical application of lists, dictionaries, and custom classes are known now.

PROJECT MANAGEMENT LEARNING

Translating user needs to technical specifications, and building features step-by-step with testing are known. I learned the importance of a user-centric design.

PERSONAL DEVELOPMENT

Effective technical work requires Problem-Solving, where complex issues are broken down into smaller, manageable parts. Success also demands Attention to Detail, which means carefully considering edge cases and potential error scenarios to ensure the system's stability. When facing inevitable setbacks and bugs, Perseverance is crucial for working through challenging debugging and technical difficulties. Ultimately, this detailed, persistent effort contributes to a strong Quality Focus, balancing the delivery of new features with high standards for code quality and overall reliability.

FUTURE ENHANCEMENTS

SHORT-TERM ENHANCEMENTS

- **Graphical Interface :**
Tkinter-based GUI for better user experience
- **Advanced Reporting :**
Visual charts and graphs for spending patterns
- **Data Export :**
PDF and Excel export capabilities
- **Search & Filter :**
Advanced expense search and filtering options

MEDIUM-TERM ENHANCEMENTS

- **Database Integration :**
SQLite for better data management
- **Multi-user Support :**
Family or small business expense tracking
- **Recurring Expenses :**
Automated recurring expense management
- **Mobile Companion :**
Basic mobile app for on-the-go expense tracking

LONG-TERM ENHANCEMENTS

- **Cloud Synchronization :**
Cross-device data synchronization
- **AI Categorization :** Machine learning for automatic expense categorization
- **Bank Integration :** Direct bank statement import and matching
- **Investment Tracking :**
Integrated investment and savings tracking

TOOLS AND SOFTWARE

P

Python 3.8

V

Visual Studio Code

G

Git for version control

C

Canva for Design

**Thank you
very much!**
